EMVCo	***Contactless Kernel C-2 Implementation Conformance Statement Version 2.11***

ICS Reference Number and Validity Period (for EMVCo administrative use only)	
ICS Reference Number:	
Valid from:	
Valid to:	

Notice: ***This ICS form must be completed for products implementing the Kernel C-2 submitted to receive EMVCo Contactless Product testing and compliance/approval. ICS form must be completed in its entirety and provided along with the corresponding "ICS - Contactless Product".***

Part I - Administrative		
Product Provider Identification		
M	Company Legal Name: (As listed on the Letter of Registration)	
M	EMVCo Registration Number:	
Laboratory Identification		
M	Company Legal Name:	
M	EMVCo Registration Number:	
ICS Submission Type		
M	Select submission type	<Select>
C	For any submission except Initial, please provide the EMVCo letter of approval reference number of the previously approved product (if already granted)	
M	Is this ICS a replacement of a previously accepted ICS?	☐ Yes ☐ No
C	If Yes. please provide the reference number of the previously accepted ICS	
C	If Yes, please provide the reason for replacing the ICS	<Select>
C	If Yes, please provide details of ICS replacement

PART II – Contactless Product Identification The completion of this section is mandatory and shall identify the product in its entirety	
Reader/terminal "Marketing name" containing the Contactless Product	
Product Name:	
Product Version:	
Kernel C-2 Application Name	
Kernel C-2 Version	
Kernel C-2 Checksum Value (only if architecture is modular)	
Test Configuration Data Set – Name and Version (Provide the identification you have assigned to uniquely identify the batch of Test Configuration used during the testing session)	
Product Test Application – Name and Version (Provide the identification you have assigned to uniquely identify the Product Test Application used during the testing session)

PART IV – Payment System Applications & Capabilities

Automation	Values
Does the product support the TEI automation interface defined in Mastercard Contactless Testing Environment - Annex D?	
Do you want your product to be tested in automated mode?	
Does the product support the optional signals?	- CONFIG: - TEST_DATA: - TEST_INFO:
Does the product support the transaction data processing through the ACT signal? **A product not supporting the transaction data processing through the ACT signal will return 'ACT_ACK:NOTSUPPORTED'. See further details in the Mastercard Contactless Testing Environment.**	☐ Yes ☐ No
Does the product also support the PCD-bypass interface? **If the PCD-bypass mode is supported, then the 3 signals APDU_ACTIVATE, APDU_CMD and APDU_RESP must be supported. See further details in Mastercard Contactless Testing Environment.**	

Implementation options	Values
Does the submitted product implement the Mag-stripe mode?	
Does the submitted product implement the **Data Exchange / Data Storage**? Data Storage includes both Static and Integrated Data Storage.	

Performance	Values
Offline Transaction Disposition Enter here your own measurements of the Offline Transaction Disposition as per EMV Book A in milliseconds The Vendor shall consider a transaction with the same configuration (terminal/reader and card) as defined for Kernel C-2 in the current version of "*EMVCo Type Approval Performance Test Cases*".	Authorized offline:
	Declined offline:
	Require switching to another interface:

Status indicators: Please detail which signal(s) the product is using to indicate a successful card read:	
Status	Signal (leds, sounds …)
Card read completed successfully
